

Jobri® Kneeling Chairs

Kneeling chairs were designed upon the ergonomic concept “A strong back is a healthy back”. By promoting good posture, the chairs strengthen the lower back muscles helping spinal alignment and support. Designed in the 1970’s, kneeling chairs are recommended by medical professionals around the world. The chairs have a five year warranty and a maximum weight limit of 280 lbs.

Ergonomic footrests promote proper body alignment, resulting in improved circulation from the footrest by elevating the feet and legs and removing pressure from the bottom of the thighs. Furthermore, it helps tilt the pelvis backward, reducing stress and strain on the back. Ergonomic footrests can be used with any type of chair, at home or in the office.
